Summary: Aspiring Software Development Engineer with expertise in backend systems, full stack web development, and REST API design. Proven ability to build secure and scalable web applications through self driven projects and hands on contribution as a backend member at GDG IIIT Sri City. Skilled in implementing authentication architectures, designing RESTful services, and applying MVC based patterns for clean, maintainable backend code.

Education

B.Tech in ECE (7.58 CGPA) | Indian Institute of Information Technology, Sri City Aug 2023 – Present
Class XII (CBSE - Science (PCM)) | **84.8%** | NS DAV Public School, Sitamarhi 2022
Class X (CBSE) | **94.3%** | NS DAV Public School, Sitamarhi 2020

Projects

Bookify - Book Selling Platform

GitHub

- Engineered a full stack bookstore app using **React.js** and **Firebase Firestore** for structured storage of books, users, and orders with real time sync and modular service design.
- Implemented **Firebase Authentication** with role based access control (RBAC) for multiple user roles (admin, seller, user), securing all protected routes and operations.
- Designed reusable component APIs for book listing, **cart management**, and order processing enabling scalable and maintainable application development.
- Tech Stack:** React.js, Firebase (Firestore, Authentication), JavaScript, HTML, CSS

Blogify - Full Stack Blogging Platform

GitHub

- Built a production ready blog platform with **Node.js**, **Express.js**, and **MongoDB** supporting structured storage of posts, categories, and comments using **MVC architecture**.
- Secured all routes using **JWT based authentication** and middleware validation; designed **RESTful APIs** for full CRUD operations on blog content with uniform error handling.
- Tech Stack:** Node.js, Express.js, MongoDB, JWT, MVC, REST APIs

Secure URL Shortener with Authentication

GitHub

- Built a URL shortening backend with efficient link generation and fast redirection; implemented **user authentication and authorization** to gate URL access behind secure REST API endpoints.
- Structured **MongoDB collections** for optimized data storage and retrieval, enabling reliable link resolution and user specific URL management.
- Tech Stack:** Node.js, Express.js, MongoDB, JWT, REST APIs

Threads Style Backend Application (Ongoing)

GitHub

- Developed scalable backend for **user profiles and post management** with Node.js and Express.js, designed REST APIs for user interactions and content operations with MongoDB data models.
- Implemented **authentication mechanisms** for secure data access following clean Controller Service architecture patterns.
- Tech Stack:** Node.js, Express.js, MongoDB, JWT, REST APIs

Technical Skills

- Technical Languages:** C, C++, JavaScript, HTML, CSS
- Tools & Platforms:** VS Code, Git, GitHub, Docker
- Databases:** MongoDB, MySQL, Firebase
- Coursework:** Data Structures & Algorithms (Basics), OOP in C++, DBMS, Operating Systems, Control Systems
- Technical Skills:** Backend Development, Node JS, Express JS, REST API Development, Authentication & Authorization, React JS, Git Version Control
- Soft Skills:** Problem Solving, Logical Thinking, Teamwork, Communication

Achievements

- Secured **3rd Rank** in Kaleidoscope of Wisdom Quiz 2023 at IIIT Sri City.
- National Science Olympiad - **District Rank 2 (Silver Medal)** 2017.
- Gold Medal - House Wise **College Basketball Competition** 2025; Zonal Level School Basketball Participation 2019–20.

Position of Responsibility

Core & Backend Member - Google Developer Group (GDG), IIIT Sri City

Aug 2025 – May 2026

- Contributed to backend workshops and sessions, guiding students on API design, Controller Service architecture, authentication flows, and Node.js deployment best practices.

PR Team Member, Web3ssh - IIIT Sri City

Operations & Logistics Team, TEDx IIIT Sri City

Tester, Fluidity.site

Dec 2024 – Jan 2025
